How to Take Memorable Photos:

- Use the highest quality setting on your digital camera or if you scan the slides, scan to a high quality jpeg file.
- Shoot early in the morning or late in the afternoon/evening
- Watch the orientation of the light as it moves across your site
- Check the area for debris, spent blooms or other 'ugly' parts
- Check your viewfinder for unwanted items in each frame.
- Use a tripod
- Try to get the greatest depth of field for a landscape.
- Bracket shots to experiment with depth of field, exposure or film.
- Look at a shot from different perspectives – higher, lower or a different angle

Excerpt from Photographing for a Purpose, The Landscape Contractor, September 2001

Owner's/Owner's Agent Consent:

I/WE hereby grant permission to enter our property or premises for the purpose of evaluating photographing and publicizing the landscape project entered in this competition to the accredited representatives of the NorthWest Landscape Network. It is understood that no fees or charges of any kind are required of the owner.
